NUDGENE SPOIL SHED

Created as a temporary building for the spoil from the tunnel project, this building was positioned right next to the airport rail link. This caused logistical considerations in the erection of the high columns.

Principal Contractor: Thiess John Holland

Work by idec: Design of columns, structural steel fabrication and erection.

Size: 60m long x 47m wide and 22m at the highest point.

Weight: 190 tonnes of structural steel.

Location: Brisbane.
