IPSWICH HOSPITAL

Expansion works totalling \$122M were undertaken at this working hospital. Our scope of work consisted of roof steelwork, fascia trusses, façade steelwork and a fully welded external stair tower as well as other miscellaneous steelwork. The stairs were fabricated in large modules to reduce the number of lifts and provide a safe worksite.

Client: Lend Lease

Work by idec: Fabricate and erect structural steel and stairs.

Location: Ipswich, QLD.
